GRADUATE RESEARCH: **Biological Control Laboratory** **Jan 2020 – Present****University of California, Santa Barbara**

- Designed and built genetic toggle switches with time-varying parameters for the purpose of optimizing plastic degradation done by bacteria.
- Mathematically modeled parameter varying genetic toggle switches.
- Provided stability analysis of time varying toggle switch models through the framework of Koopman Operator theory.
- Developed algorithms which fit time varying parameters to the pertinent toggle switch models.
- Built a library of promoters which give distinct gene expression profiles during different bacterial growth phases.

UNDERGRAD RESEARCH: **Delplanque Research Group** **June 2018 – Aug 2018****University of California, Davis** (Funded by UC LEADs)

- Carried out numerical simulations of respiratory drug intake in the human trachea using OpenFOAM.

- Found correlations between parameters of the simulated particle injections and the evenness of the particle distributions.

Coimbra Research Group

June 2017 – Aug 2017

University of California, San Diego (Funded by UC LEADs)

- Conducted research on numerical methods to solve variable order differential equations (VODEs) using MATLAB.
- Devised an efficient numerical method that could solve VODEs 50% faster than conventional methods, so VODE model predictions could be made more quickly, improving the energy efficiency of the system.

Center for Advanced Surgical and Interventional Technology

June 2014 - Aug 2014

University of California, Los Angeles (Volunteer)

June 2016 - Aug 2016

- Assisted in the testing of an innovative way to treat prostate cancer known as focal laser therapy.
- Used Meshmixer to design a model of a human head to test remote trans-oral surgery.
- Developed molds using Solid Works to test the effects of a catheter-fed laser on phantom tissue.
- Compiled lists of potential treatment candidates within the UCLA health database using SQL.
- Tested haptic feedback on the da vinci remote surgical robot.

EMPLOYMENT: Supplemental Instructor

Sep 2016 - June 2019

University of California, San Diego

- Facilitated math workshops for college students consisting of tutoring and support to ensure their academic success.
- Worked with professors to develop lesson plans which would supplement material from courses.
- Classes Supported: Linear Algebra, Calculus (1,2,3), Pre-Calculus.
