GRADUATE RESEARCH: **Biological Control, Computing, and Learning Laboratory** **Jan 2020 – Present**
University of California, Santa Barbara

- Designed genetic toggle switch with quorum sensing (GTSQS) with time-varying parameters for the purpose of optimizing plastic degradation done by bacteria.
- Mathematically modelled the GTSQS switch with a 3-state nonlinear ODE.
- Provided stability analysis of toggle switch models through the framework of Koopman Operator Theory.

UNDERGRAD RESEARCH: **Delplanque Research Group** **June 2018 – Aug 2018**
University of California, Davis (Funded by UC LEADs)

- Carried out numerical simulations of respiratory drug intake in the human trachea using OpenFOAM.
- Found correlations between parameters of the simulated particle injections and the evenness of the particle distributions.

Coimbra Research Group**June 2017 – Aug 2017****University of California, San Diego** (Funded by UC LEADs)

- Conducted research on numerical methods to solve variable order differential equations (VODEs) using MATLAB.
- Devised an efficient numerical method that could solve VODEs 50% faster than conventional methods, so VODE model predictions could be made more quickly, improving the energy efficiency of the system.

Center for Advanced Surgical and Interventional Technology**June 2014 - Aug 2014****University of California, Los Angeles** (Volunteer)**June 2016 - Aug 2016**

- Assisted in the testing of an innovative way to treat prostate cancer known as focal laser therapy.
- Used CAD for the modeling of a human head to test remote trans-oral surgery.
- Developed molds using Solid Works to test the effects of a catheter-fed laser on phantom tissue.
- Compiled lists of potential treatment candidates within the UCLA health database using SQL.

EMPLOYMENT: Supplemental Instructor**Sep 2016 - June 2019****University of California, San Diego**

- Facilitated math workshops for college students consisting of tutoring and support to ensure their academic success.
- Worked with professors to develop lesson plans for the facilitation of math workshops that supplemented material from courses.
- Classes Supported: Linear Algebra, Calculus (1,2,3), Pre-Calculus.
